

NEW PRODUCT – INVISIBLE GLASS EZ GRIP ClearDry™ Formula Tested Streak-Free

New Research Shows Invisible Glass® Proven Streak-Free

Eighty percent of people who spring clean will be focused on cleaning windows.* For most, that means a tedious task involving squeegees, newspapers, vinegar, or unreliable soapy cleaners that leave streaky residues and attract dust and dirt.

*Invisible Glass®
EZ Grip™*

An independent study from the Advanced Materials Research Center of Rutgers University has shown the new Invisible Glass® EZ Grip glass cleaner was the only glass cleaner tested to clean streak-free.

Invisible Glass® is designed specifically for glass surfaces. The ClearDry™ formula is free of soaps, scents, and dyes that are difficult to remove from glass and leave streaky residues. And, as the name implies, it's easy to use – simply spray on; the fine-mist stays in place and immediately starts breaking down oily fingerprints, dirt, and grease; then wipe it away with a microfiber cloth – no special tools or tricks required.

Many other products clean but can't leave glass clear. Common cleaners deposit microscopic solids from soaps and additives that leave residues on the surface. These residues disrupt how light penetrates and reflects off glass in the form of streaks.

About Invisible Glass Invisible Glass® is available in a 22oz trigger spray bottle and 19oz EZ Grip spray aerosol bottle. Invisible Glass® is a division of Stoner Inc., a family owned company providing time-saving solutions since 1942 and proudly manufactured in the U.S.A.
